**Matthew Lederman, M.D., Joins The Continuum Reproductive Center of
St. Luke's-Roosevelt Hospital Center**

New York, NY (September 15, 2009) Matthew Lederman, M.D., a fellowship-trained reproductive endocrinologist and board-certified obstetrician and gynecologist, has joined the fertility team at one of New York's most successful and highly respected fertility practices: The Continuum Reproductive Center (CRC) of St. Luke's-Roosevelt Hospital Center.

"After a highly selective two year process, we are thrilled to welcome Dr. Matthew Lederman to our Continuum Reproductive Center team," says Martin D. Keltz, M.D., Director of the Continuum Reproductive Center. "Matt has already enhanced our Manhattan IVF practice, he is reinvigorating our public service at St. Luke's and Roosevelt Hospital's reproductive endocrine clinics and he plans to expand the CRC to Northern Westchester."

An alumnus of The University of Michigan and The Chicago Medical School, Dr. Lederman completed his residency in Obstetrics and Gynecology as well as his fellowship in Reproductive Endocrinology and Infertility at the Albert Einstein College of Medicine/Montefiore Medical Center. Dr. Lederman is a diplomate of the American Board of Obstetrics and Gynecology and a member of the American College of Obstetrics and Gynecology, American Society of Reproductive Medicine, Society of Reproductive Endocrinology & Infertility and The Endocrine Society.

Dr. Lederman has published scientific abstracts and articles in peer-reviewed journals in the fields of endocrinology and infertility, and has presented his research at national conferences. His special interests include: unexplained infertility; reproductive imaging and in vitro fertilization.

About the Continuum Reproductive Center:

Located near Columbus Circle on the Upper West Side of Manhattan (across from Roosevelt Hospital), The Continuum Reproductive Center offers comprehensive diagnosis and treatment for infertility, recurrent pregnancy loss, hormonally-related health problems, and pelvic pain caused by fibroids or endometriosis. The Continuum Reproductive Center's on-site laboratories offer the latest technology for in vitro fertilization and related procedures, carried out by expert scientists and technicians.
